READY MIXED
FOR USE.

WE Guarantee our Mixed Paints in every respect STRICTLY FIRST-CLASS and reliable, and sold at the very lowest possible price for first-class goods. They are prepared for the brush, if they should be a little too heavy or thick, thin them down with Linseed Oil or Turpentine—better use oil. We offer them as the

Most Durable and Economical Paints

ever produced. One gallon will cover from 225 to 250 square feet, two coats.

They are put up in bbls. 50 to 40 gallons. Kegs, 20, 15 and 10 gallons. Pails, from 1 to 5 gallons.

CHEAP MIXED
ROOF PAINT.

WE would call special attention to our cheap Ready Prepared Paints for Metal or Shingle Roofs of both colors, (Red and Purple.) These paints, though cheap, are by no means a poor and worthless article, but will give perfect satisfaction when used.

Take this paint with the use of the Garry Iron Roofing Co's Cement, (which we keep for sale,) for cementing up the holes, leaks and bad places, old Iron and Tin Roofs can be made perfectly tight and restored to use.

Give it a trial.

GROUND IN OIL.

WE use pure Linseed Oil in grinding our paints in paste form. They do not dry out and become hard like those ground with Foot's, Fish Oil, etc. They are readily reduced for the brush with Linseed Oil and will hold up well, being ground so fine.

It is put up in bbls., one-half bbls., kegs and pails.

WE GUARANTEE OUR PAINTS

in every respect to be the best in the market.

DRY PAINTS.

THE Dry Paints, by the use of our improved machinery, are pulverized VERY FINE—no better made—which makes it easy to mix with oil, and when used produces a very fine and smooth surface.

They are extensively used for

Buildings, Fences, Floors, Cars, Brick Buildings, Bridges, Steamboats, Iron, Tin and Shingle Roofs,

Iron work of all kinds. Any place where paints are used that the color is suitable.

SPECIAL attention is called to our Purple for coating Iron Vessels, Bridges, Roofs, and all Iron-work. It is so pure, that it partakes of the nature of iron when applied as paint.

The Red is put up in bbls. of 500 lbs., one-half bbls. 250 lbs., one-fourth bbls. 150 lbs.

The Purple in bbls. of 600 lbs., in one-half bbls. 400 lbs., one-fourth bbls. 200 lbs.

IRON ORE PAINTS.

THESE Paints are made from the Purest and Best Lake Superior Iron Ore, two kinds, Red Rossie and Jackson Purple. The (Rossie) Red is widely known as the finest and purest ore found in our country, and when pulverized into paint, it produces a very soft, pliable and elastic paint of a rich red color, and cannot be equalled for covering capacity, except by the Purple. It is used for all kinds of painting.

The famous Jackson Ore is the richest, heaviest and purest ore known. When pulverized produces a beautiful Purple Paint, which cannot be surpassed for beauty, quality, covering and durability. For metal painting it has no equal. It is impervious to salt-water, gasses, acids, and the elements. Examine proof Morley's Analyses.
